Welcome to Math 1113, *Precalculus*. The course is designed to offer a broad introduction to the topics necessary to succeed in calculus. We will examine a range of issues from the definition of function, exponential and logarithmic functions, and trigonometric functions. The goal is not to solve particular equations. Our goal is to understand the different techniques and approaches. **The course syllabus is a general plan for the course; deviations announced to the class by the instructor may be necessary.**

We will explore the following topics:

<table>
<thead>
<tr>
<th>Topic</th>
<th>Important Ideas</th>
</tr>
</thead>
<tbody>
<tr>
<td>Function</td>
<td>Determine the relationship between dependent and independent variables. Determine the range and domain of a given function.</td>
</tr>
<tr>
<td>Inverse Function</td>
<td>Determine an inverse function and relate it to the original function.</td>
</tr>
<tr>
<td>Exponential Functions</td>
<td>Define functions that model various phenomena and compare to other relationships such as linear and quadratic functions.</td>
</tr>
<tr>
<td>Logarithmic Functions</td>
<td>Relate logarithmic functions to exponential functions and solve equations with both exponential and logarithmic terms.</td>
</tr>
<tr>
<td>Trigonometric Functions</td>
<td>Relate trigonometric functions to the unit circle, define functions that model physical phenomena, solve equations with trigonometric terms, and define inverse functions for trigonometric functions.</td>
</tr>
</tbody>
</table>

**Course Goals** Be able to define functions that describe various physical phenomena. Be able to manipulate relationships to isolate particular quantities of interest. Demonstrate a working knowledge of the domain and range of a function and the relationship between the range and domain.

**Textbook:** Precalculus, Julie Miller and Donna Gerkin, McGraw Hill. A special edition for UGA is available at a reduced rate, and the ISBN is 978-1-30-700456-4. You will need access to the ALEKS 360 homework system which is included with the UGA edition of the book. The book should be available at the UGA bookstore as well as other local bookstores.

**ALEKS 360** You will have an account set up on ALEKS. You will find a link to ALEKS from the course ELC web page. When you click through the first time, your account on ALEKS will be initiated. You should access ALEKS through the link on ELC. ALEKS has really good tech support so please use it if you encounter a technical problem!

**Web-pages:** [http://www.math.uga.edu/1113](http://www.math.uga.edu/1113) and [danielmckenzie.github.io](http://danielmckenzie.github.io)

**Meeting Times:** We meet Tuesdays and Thursdays from 8am - 9:15am in Boyd, room 302.

**Attendance** Students who have more than five unexcused absences will be withdrawn from the course. The five unexcused absences should only be used for emergencies, and you may be asked to verify the reason for an absence. If you repeatedly leave class early or arrive late it may be counted as an absence.
Communication  All course announcements will be made via ELC. I encourage you to ask me questions, preferably via ELC discussion boards or messenger.

Basic Skills Tests  These will be proctored tests on ALEKS, done in the Math department computer rooms. The focus is on calculations and basic ideas. There will be three rounds of tests. In each round there will be two tests, and your grade for each round will be the higher of the two grades. Dates TBA.

Written Test Dates  The tests are tentatively scheduled for 8 February, 6 March, and 12 April. The tests will take place in your regular classroom during scheduled class. You should bring your own pencils and calculator. **You can only use a TI-30X IIS or lower level calculator for tests** You can use a TI-84 in class but cannot use it on quizzes or tests. The (comprehensive) final exam will take place on 3 May from 7 to 10pm.

Grading  The final grades are calculated using the following distribution:

- 45%  Three In Class Tests.
- 10%  Four Basic Skills Tests
- 20%  Final Exam.
- 15%  ALEKS Homework.
- 10%  In-class quizzes and groupwork.

At the end of the semester we assign letter grades as follows: 92% for an A, 89% for an A-, 87% for a B+, 82% for an B, 79% for a B-, 77% for a C+, 72% for an C, 69% for a C-, and 66% for a D.

If your final exam is higher than your lowest test score from the three tests, then the lowest test score will be replaced with the final exam score, conditional on your maintaining a good attendance record.

Make up Policy  The right to miss a scheduled test and take a make up exam can be awarded only by your professor, and will be awarded rarely and only for a serious cause. **Do not count on being able to make up a test until you have explicit permission from your professor.** If for some reason you must miss a test (eg. UGA athletics) let me know beforehand!

Academic Accommodations  If you require any kind of special accommodation please see your professor. Requests for academic accommodations should be made as soon as possible and at least one week prior to a graded activity to insure that we provide the proper resources. Students must register with the Disability Resource Center, to verify their eligibility for appropriate accommodations.

Office Hours  Days and times TBD. Meetings can also be arranged by appointment.

Academic Integrity  As a University of Georgia student, you have agreed to abide by the Universitys academic honesty policy, A Culture of Honesty, and the Student Honor Code. All academic work must meet the standards described in A Culture of Honesty found at: [https://ovpi.uga.edu/academic-honesty/academic-honesty-policy](https://ovpi.uga.edu/academic-honesty/academic-honesty-policy). Lack of knowledge of the academic honesty policy is not a reasonable explanation for a violation!
